Holistec Systems is a Wellington-based boutique systems integration specialist delivering IT solutions to Small and Medium sized business Enterprise (SME) and software and IT consulting solutions to Enterprise class organisations

Our mission is:

To be known throughout New Zealand as an IT systems integration specialist that brings high value technology solutions to bear on serious business problems that in turn quickly translate into efficiencies and growth for our Customers

Surrounded by creativity, innovation, and a shared hunger for Customer success, we enjoy showing up at the office each day to see what can be created in eight or more hours. We do this so that we can:

Wrap our arms around your business problems and solve them with technology

For our Customers, this means we are always focused on delivering IT projects that not only provide easy to use IT solutions, but at the same time create efficiencies and growth for your business.

SO WHY IS HOLISTEC UNIQUE?

- **We are broad but specific** – using a methodology we have developed that allows our world class engineers, analysts and project managers to engage with you broadly on any IT mission, but solve the puzzle with very specific hand chosen technologies that we are experts in deploying
- **We will fix the price** – customer's love our fixed price model for IT projects. You get peace of mind and a price guarantee. After all, we are supposed to know what we are doing!
- **We are curious** – our staff are our best asset – and they really want to know how to increase revenue, reduce cost or improve Customer satisfaction for your Customers in your business using the latest technologies
- **We are clever** – we continually invest in technical education so that you don't have to. Count on us to have the IT answer when you need it – we really are problem-solvers
- **We are referenceable** – we have built a loyal customer base and are proud to be associated with some of the world's leading IT brands
- **We are choosy** – oops sorry, but if you want the cheapest price and won't commit to a two-way partnering agreement then we will struggle to deliver value in your business. There is nothing wrong with DIY – in fact New Zealand is known for it – our belief though is that you need to consider leaving DIY where it belongs - at home. We are here for you when DIY is not in your business DNA
- **We continue to grow with ambitious goals** – one of our primary goals is to ensure that our Customers will continue to recognise Holistec as a trusted and reliable IT partner.

OUR HISTORY

For a young business we have achieved some important milestones. Holistec started with 20 customers and now has a loyal base of more than 250 customers, as well as relationships with some of the world's leading IT suppliers. We continue to grow from strength to strength. Our strong focus, customer loyalty and positioning within the industry means reliable support for you, our Customer, year after year

2012

- Company formed under the parent LAM Systems Limited (which has delivered IT software solutions to the aviation industry since Oct 1989)
- Customer acquisition strategy based on broad but specific methodology
- 20 Customers in total with three staff

THE HOLISTEC APPROACH

Technology is a business life line

Whether it's having access to a reliable server or cloud environment, optimised Internet connections or a solid email presence; if the

IT solutions are deployed correctly, the right technology can provide a competitive edge and grow a business.

OUR BROAD BUT SPECIFIC MODEL

Our unique approach to delivering our technology solutions is captured in our core values.

Wrapping our arms around your business problems and solve them with technology

This means we don't just provide technology, we deliver a business solution for our customers that will reduce their costs, increase their revenue and enhance customer satisfaction.

Underpinning this approach is our 'Broad but Specific' delivery model, which offers:

- A broad range of services to meet all your technology needs, from laptops, desktops, email and wireless and Hyperconverged Infrastructure to monitored printing, networking, disaster recovery and telephony.
- A specific expertly selected leading international brand for each service, for example for our wireless service we provide the enterprise-level Ruckus Wi-Fi brand, which we have installed in schools around New Zealand and businesses such as Wellington's world-class Chartered Accountancy firm Pocock Tong Trass.

BENEFITS OF OUR APPROACH

Some of the benefits our customers enjoy with our Broad but Specific approach are:

- **Reduced IT costs**

We work with Asia Pacific ready brands, which are leading brands that we have selected because they offer the best fit for the SME market in New Zealand and the wider Pacific Rim. By working with one brand for each service, we have forged exclusive partnerships with our chosen brand partners, which drives down costs and brings further advantages for our customers such as extra support and no questions asked “hot-swap” hardware.

- **In-depth IT expertise**

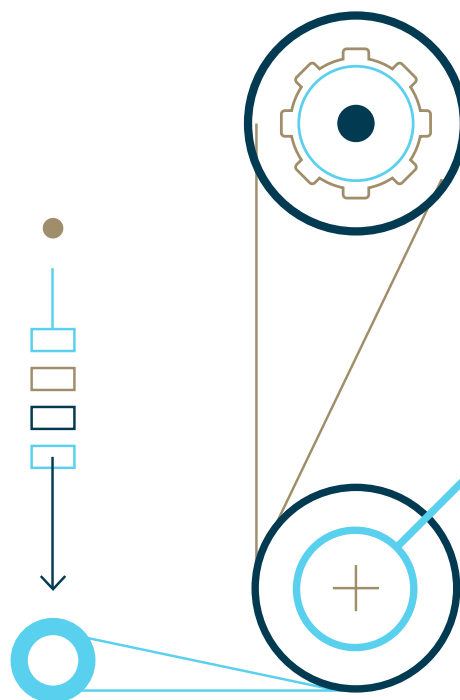

Our customers can be confident about the high quality of our IT solutions. By focusing on one brand for each service, our team has developed serious, professional expertise in successfully working with our brands, as well as a high level of capability in solving your business problems.

- **Peace of mind**

Our solutions offer less risk and faster installations for customers. Our depth of expertise in dealing with our specific brands allows us to back our solutions by providing a fixed price installation guarantee; and that we will work on the problem until you are happy with the solution, at no extra cost.

- **Simplified solutions**

We take the pain out of having to choose from a bewildering array of products for our customers. We have already done the hard work researching and selecting the best products that are relevant to this market.

YOUR TRUSTED IT PARTNER

It's important for us to be recognised as a trusted and reliable business partner, so we don't just implement a solution and walk away. Providing strength and stability through a working partnership with our customers is important to us:

- We continually manage our customer relationship ensuring everything is as you expect.
- If there are any issues, we will fix them.
- We are available 7am-10pm NZ time Mon-Fri to cater to your specific requirements. It is very likely that we will answer our cell phones outside of those hours also - we are the only Systems Integrator to publish our cell phones on our Web Site at www.holistec.co.nz

OUR CORE VALUES

As a values-based business everyone at Holistec adheres to a set of core values that ensure we provide an unsurpassed level of service to our Customers in the New Zealand IT solutions market

Having this strong set of core beliefs also focuses our staff on being a dynamic team of problem solvers placing the customer at the centre of all that we do.

- naturally upbeat
- refreshingly honest
- unconditionally supportive
- remarkably intelligent

NATURALLY UPBEAT

We are not your stereotypical IT team. We are fun and interesting to deal with and can explain our IT solutions simply and effectively. Our customers can rest assured that they are not only in good technical hands, but are also afforded the opportunity to fully understand and enjoy the technology experience

REFRESHINGLY HONEST

Most IT vendors will ask for a budget and deliver a solution, whether it solves your business problems or not. We don't. Holistec is committed to providing an honest appraisal of the work and fixing the problem. We believe that it is better to do the job properly, and solve the problem, rather than settle for a poor solution. We view IT solutions as an investment in your business and our focus on solving business problems means we sometimes actually decline projects that cannot get results. By delivering efficiencies, Holistec solutions lower costs and increase revenues for a business like yours

UNCONDITIONALLY SUPPORTIVE

With Holistec you will avoid cost overruns on your IT projects. You will pay the price that was agreed upon at the outset. Our fixed price installation guarantee means we will work on the problem until you feel happy with the solution

We believe that:

it is better to do the job properly,
and solve the problem

REMARKABLY INTELLIGENT

We are proud to be experts in the products and services we provide. Our depth of expertise in the solutions we offer allows us to accurately fix the price of a project. Therefore, we can confidently offer our fixed price installation guarantee and back our products and services

OUR PEOPLE

*Our people are the driving force behind
Holistec's success*

We place great importance on everyone at Holistec being involved with the customer journey.

Our solutions are delivered by Holistec's three key business units, Sales and Marketing, Professional Services and Software

Development, each headed by a manager working with a team of IT experts. This simplified business structure allows each team to be fully focused on the customer and providing the solution that best suits your requirements.

OUR PEOPLE

Our team has the expertise to deliver solutions that offer real value and help position your business for growth.

- We don't just install systems, we work with our customers to ensure maximum output is gained
- We are Systems Integration experts
- We will configure a network solution that drives growth in your business

OUR CORE MANAGEMENT TEAM

Melinda Button
GENERAL MANAGER

Melinda has been a part of the Holistec team since our inception, joining Holistec because of her commitment to our core values and customer services. Her primary role is to build strong and happy relationships with our customers. This involves both account management and driving service delivery for our IT solutions. Melinda has a background in financial services and insurance industries and previously worked in London as a test and business analyst. Melinda and her Team were the functional specifiers for Supertec.

Mike Ross
SALES AND MARKETING MANAGER

Mike founded Holistec in 2011 having previously carved a niche as an IT solutions industry leader. Prior to working at Holistec he established the New Zealand operations of two international IT companies and built these, each over a seven-year period, from scratch into multi-million dollar businesses. A seasoned IT professional, Mike's expertise spans hardware, electronics, avionics and software, and also has experience in such specialist areas as creating enterprise-level software solutions for the Government and Customer Relationship Management (CRM) and Workforce Management systems. With his customer focus and strong leadership skills, Mike is the driving force behind Holistec's success.

Sara Burns
SOFTWARE DEVELOPMENT MANAGER

Sara has held a variety of roles in the IT industry and the government sector specialising in systems integration, CRM, service-oriented architecture (SOA) design, workflow development and project management. Her project management experience includes developing and supporting an early tier-one CRM system for 15 years. In this role, she also developed alternative web service access methods after the system was discontinued and unsupported. Sara and her Team built Supertec, we are very proud of this achievement.

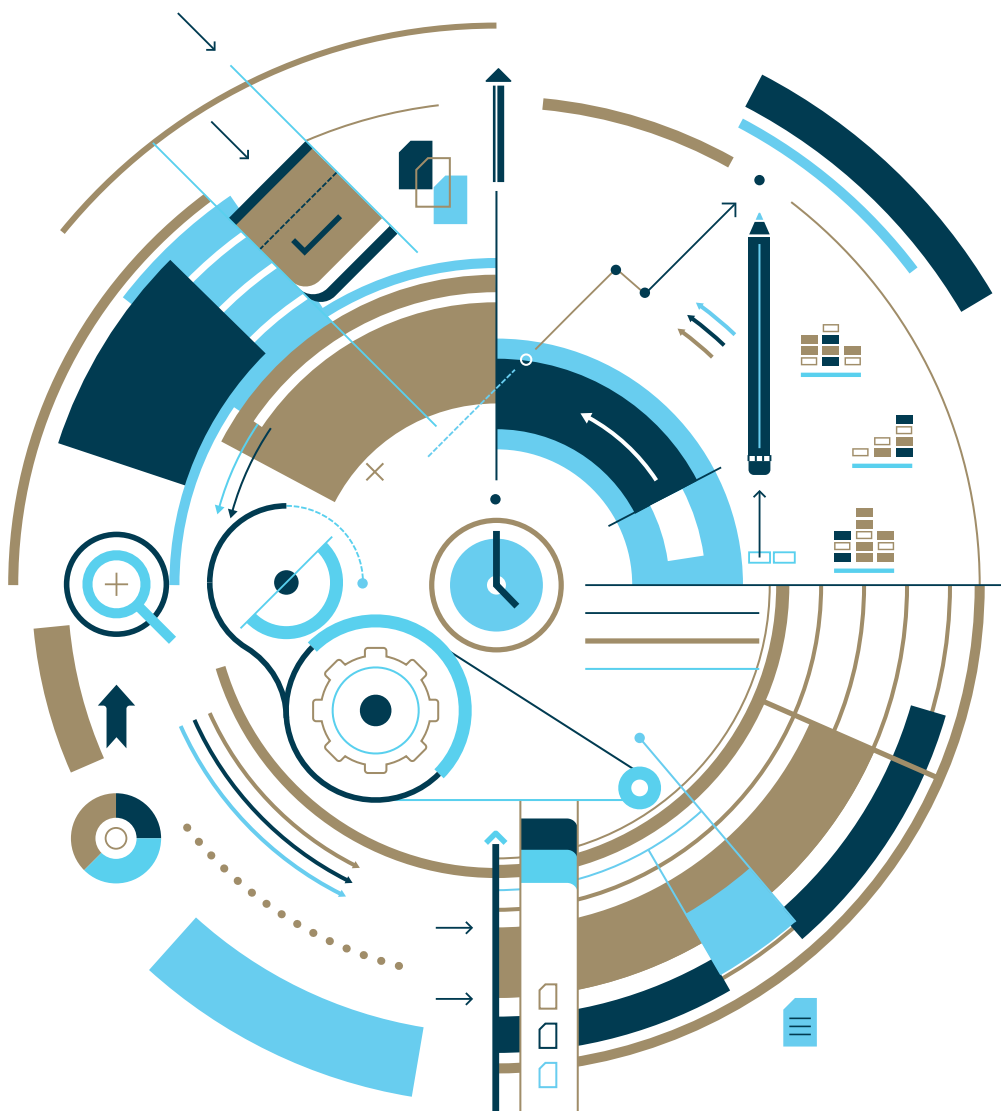

OUR PROFESSIONAL ADVISORS

We are very grateful to our team of professional advisors who are our lifeline. They help support our vision and guide us through the business jungle giving us impartial and honest recommendations.

- Pocock Tong Trass - our very cool Team of Financial Consultants
- John Melville - Business Advisor and member of the Board
- Bill Brierley - Legal Counsel

HOLISTEC'S INTERN PROGRAMME

Our internship programme is designed for IT students to learn important workplace skills such as communication, administration and time management, as well as a place to prove and improve their technical skills. The programme is a key recruitment input for Holistec, ensuring we have a steady stream of talented staff with both the technical and workplace skills to provide a high level of customer service to our clients. The very successful programme is run by our core management team.

OUR SOLUTIONS

*Our IT solutions are tailored to
meet the needs of the New Zealand
SME market*

We offer a range of specialist solutions that we have designed to deliver efficiencies to your business. These solutions help our customers

reduce their costs, enhance staff productivity and increase their revenue.

Our solutions include:

ENTERPRISE-LEVEL WIRELESS

We install really smart Ruckus Wireless technology in your building, warehouse, apartment, hospital or school. One of our solutions, using Ruckus's Unleashed Wi-Fi for Small Businesses, is purpose-built for the New Zealand market

VOICE OVER INTERNET PROTOCOL

Our Voice over Internet Protocol (VOIP) solution, developed alongside leading Unified Communications Vendors, will slash your business's telephone bills. Reduced costs for VOIP now make it an affordable option for SMEs wanting to take advantage of the huge savings it offers. Our customers pay just a small one-off upfront cost to set it up and a minimal monthly rate for phone lines

MONITORED PRINTING

Our Managed Print solution, developed with Hewlett Packard, means our customers never have to buy toner again. It offers both toner and service for free. This solution allows you to print from any mobile device, such as a tablet, smartphone or laptop. We will configure your workplace printers to allow for easy wireless printing through these devices

HYPERCONVERGENCE

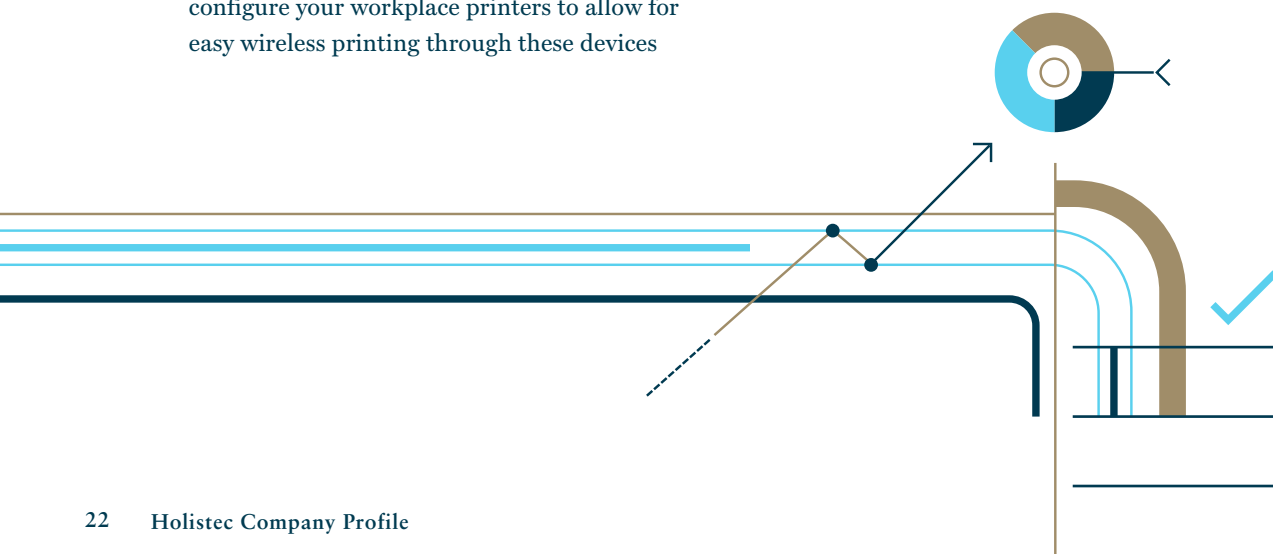

Legacy infrastructure—with its separate enterprise storage, networks, and servers—is not well-suited to meet the growing demands of enterprise applications and fast-paced modern business

IT leaders are now turning to hyperconverged infrastructure to knock down these silos, and deliver on-premise IT services with the speed and operational efficiency of the public cloud

Holistec is one of the few Nutanix vendors in the market that really understand how to apply Hyperconvergence to the SME space to really get the promised gains and efficiencies

SOFTWARE DEVELOPMENT

Holistec's clever team of software developers build software to suit our customers' requirements and are specialists in bringing hardware together to ensure compatibility

UNIVERSAL THREAT MANAGEMENT

Sophos XG Firewall provides unprecedented visibility into your network, users, and applications directly from the control centre. You also get rich on-box reporting and the option to add Sophos iView for centralised reporting across multiple firewalls

NETWORK CONTINUITY, WEB APPLICATION FIREWALLS (WAF) AND FAILOVER

As businesses move their applications to a cloud environment, their wide area network becomes more vulnerable to attacks. We provide powerful solutions for Internet business continuity, 4G failover, WAN redundancy, temporary networking, pop-up networks, same day Internet service, emergency and rescue networks, network disaster recovery and high-speed satellite networking. We also offer Web Application Firewall hosting to keep your websites safe from hackers

IT INFRASTRUCTURE, HOSTING AND OUTSOURCING

Use our Managed Services solution and let Holistec manage your IT department for you. You will be surprised how much money you can save and how much more our IT team can deliver for your business. We have monthly plans tailored to suit your business size. This solution will provide you with peace of mind knowing that our team of qualified experts are looking after all of your IT requirements 24/7

PAYMENTS AND RECONCILIATION SOFTWARE

Many businesses have the problem of disparate payment systems and inconsistent payment methods across their organisation. Our shared Transaction Lifecycle Management online system for customer payment and refunds offers a consistent set of payment methods

OUR PRODUCTS AND SERVICES

*We are passionate about bringing the
best IT solutions to the SME market
on time, on budget and with the least
amount of risk involved*

The Holistec team have worked hard to develop our proprietary 'Broad but Specific' model to

achieve these outcomes for our customers and also position your business for growth.

OUR SOFTWARE INNOVATIONS

Holistec has carved a strong reputation in New Zealand's IT industry for our expertise in developing and custom building software for our Customers

We have also developed our own software offerings for enterprise-level financial organisations.

OUR SUPERTEC SOFTWARE

Supertec is the only available superannuation software product designed to meet the needs of the New Zealand financial market.

Supertec provides superannuation administrators with the ability to quickly and simply deal with the full administration functions of any New Zealand superannuation scheme. The Supertec system records the financial history of member and employer activities in a superannuation scheme.

Holistec developed Supertec - formerly Retirement Accumulation and Pension Payments System (RAPPS) - to support the evolving needs of our clients in managing their superannuation funds recording, administration and reporting requirements.

The state-of-the-art software provides a superannuation structure and the ability to have insurance and the KiwiSaver scheme supporting this framework, giving peace of mind to administrators, as well as an efficient and up-to-date system.

Supertec is used in banks, insurance companies and businesses across New Zealand to administer their superannuation schemes. Our Supertec clients include:

- i-Select
- Westpac
- BNZ OPA
- Toyota NZ
- Civic Financial Services
- Melville Jessup Weaver

Supertec provides superannuation administrators with the ability to efficiently deal with the full management functions of any New Zealand superannuation scheme.

The system accurately records the full financial history of each member and employer activities in a superannuation scheme, not only providing the relevant information to administrators but financial trends which can then be analysed and assessed.

The system interfaces allow:

- **Entry of contributions**
It is possible to enter member contributions by way of API (REST or SOAP), spreadsheet or text file.
- **Payments to pensioners and members**
The system can generate files to initiate payments by direct credit to exiting members or to pensioners.
- **Accounting summaries**
A text file or API call containing a summary of financial transactions held in the system can be generated for output to, for example, an accounting package.

We are very proud of what we have achieved alongside our customers in developing Supertec. Ongoing development is Customer led first and foremost and then technology stack led as a secondary priority, ensuring that Supertec will remain relevant and performant for many years to come.

See <http://www.holistec.co.nz/content/supertec> for more information about Supertec

*From the team at i-Select,
we just wanted to say a huge thanks to
Melinda, Sara & the rest of the
Supertec team for the effort that has
been put in recently. We really
appreciate all the hard work & the
exceptional service that you have given
us. Hope you enjoy a wee few goodies
from us as a token of our appreciation.*

Here are some of the leading international brands we have partnered with to deliver world-class IT solutions for our Customers:

NUTANIX

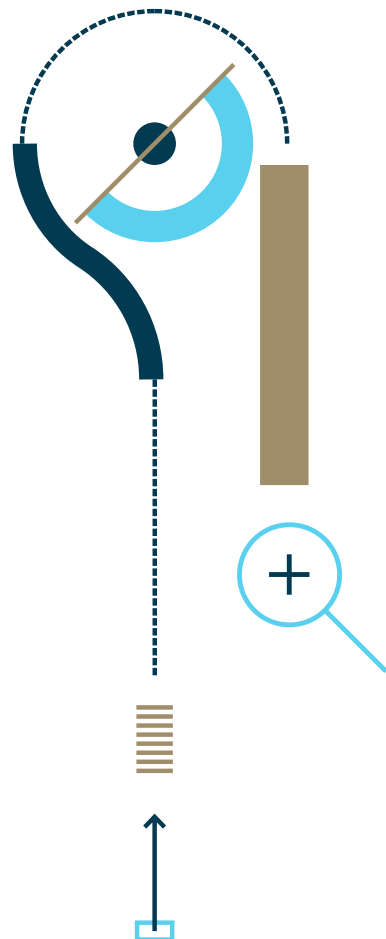

Nutanix makes infrastructure invisible, elevating IT to focus on the applications and services that power their business.

The Nutanix Enterprise Cloud Platform blends web-scale engineering and consumer-grade design to natively converge server, storage, virtualization and networking into a resilient, software-defined solution with rich machine intelligence.

SOPHOS

IT security products have become as complex as the networks they're trying to secure. When we recommend Sophos we know that the solution to complexity is not more complexity. We tackle security challenges with clarity and confidence, knowing that simple security is better security.

Sophos XG Firewall provides unprecedented visibility into your network, users, and applications directly from the control centre. You also get rich on-box reporting and the option to add Sophos iView for centralized reporting across multiple firewalls.

RUCKUS WIRELESS

We love Ruckus Wireless and so do our customers! This SME Wi-Fi solution is purpose built for the New Zealand market, and provides clients with a reliable Wi-Fi package.

Ruckus Wireless can be installed into your building, warehouse, apartment, hospital, and school – just about anywhere!

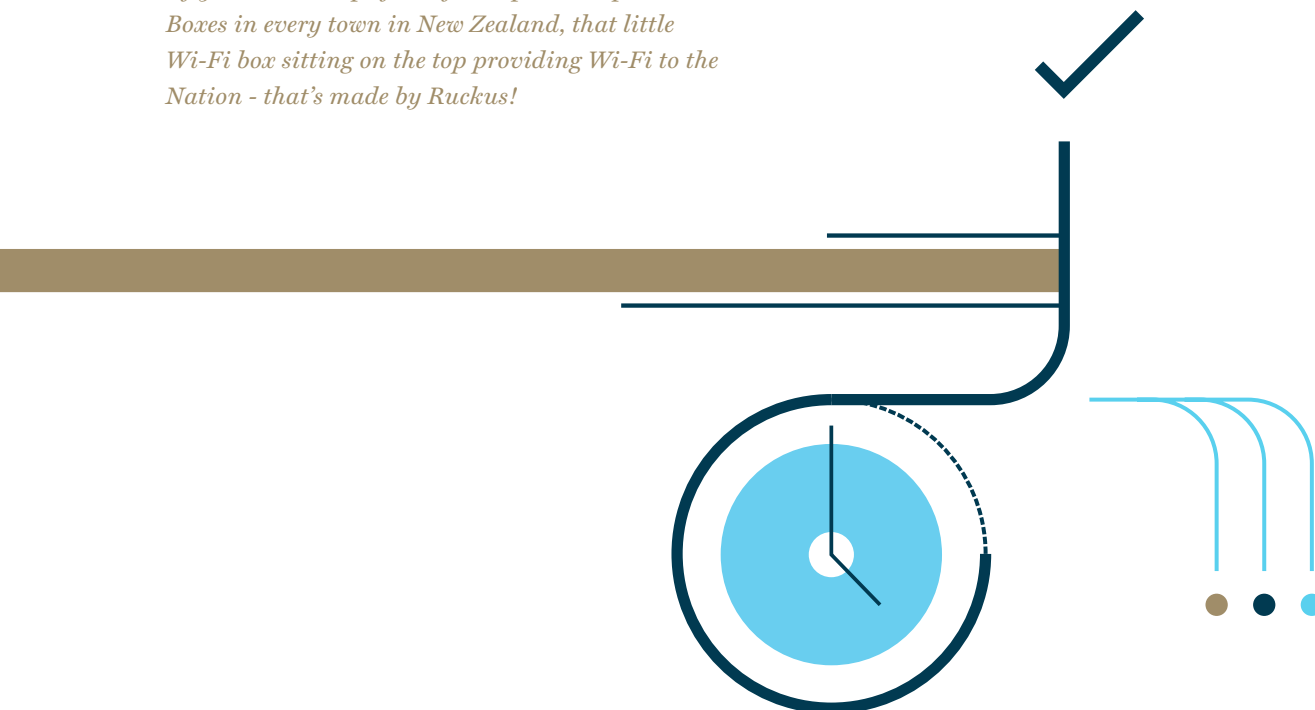

A pioneer in the wireless infrastructure market, Ruckus enables carriers and enterprises to stay ahead of the exploding demand for high-bandwidth applications and services. Ruckus Smart Wi-Fi technology redefines what's possible in wireless network performance with flexibility, reliability, and affordability.

If you look on top of all of the Spark Telephone Boxes in every town in New Zealand, that little Wi-Fi box sitting on the top providing Wi-Fi to the Nation - that's made by Ruckus!

MICROSOFT OFFICE 365

Business isn't just about 9-5 these days, so having an 'office' in the cloud allows total flexibility and provides peace of mind.

Office 365 is a name many people can associate with and is proving a popular choice. Hosted by Microsoft, this service brings together the power of Office with business class email, document sharing, instant messaging and video conferencing to give consumers anywhere access to the things needed to get things done across your devices - from PCs to smartphones and tablets.

OUR CUSTOMERS

*Our customer base is varied from
schools and medium-sized businesses
to large national corporates and major
organisations*

We work with clients who believe what we believe in, allowing us to grow a loyal and strong customer base across New Zealand.

CIVIC FINANCIAL SERVICES

Civic Financial Services Ltd is owned by local government and supplies local government with a range of financial services. We provide Civic with IBM Virtual Infrastructure, which also includes Ruckus Wireless and Universal Threat Management technology from Sophos.

FUSION INTERIORS LIMITED (FIL)

Fusion Interiors Limited (FIL) is a Wellington-based commercial interiors services provider. The company has been operating successfully in Wellington’s commercial interior industry, providing clients with a wide range of services from commercial moving and office and retail fit outs to supplying second-hand furniture. FIL is one of our Ruckus Wireless customers; we’ve provided a sophisticated combination of indoor and outdoor technology (via fibre) to drive the new FIL warehouse in Porirua.

MELVILLE JESSUP WEAVER

Melville Jessup Weaver is a firm of consulting actuaries with offices in Auckland and Wellington, New Zealand. The firm provides actuarial consulting advice, education and software solutions in the areas of insurance, superannuation, KiwiSaver, asset management, financial analysis and risk management.

We provide our full outsourced Managed IT solution as well as Supertec to this important Customer.

.

HOW WE HELPED FUSION INTERIORS LIMITED—

Holistec has been our IT supplier for a number of years. During that time, we have found the Holistec team to be very knowledgeable of the systems and competent in their delivery of service.

They are a great company to deal with and are always dedicated to finding solutions to our IT queries, as well as explaining the “IT terminology” in a way which is simple to understand! We are always given options to finding the best IT solutions for our company – the pros and cons, and it’s always great value for money allowing us to keep our IT modern and in line with the ever evolving IT industry!”

OTARI SCHOOL

Otari School is one of the many schools throughout New Zealand where we have implemented Ruckus technology via the School Network Upgrade Project set up by the Ministry of Education

WAGAMAMA WELLINGTON

“Since bringing Holistec onboard I have real confidence that the IT situation is well in hand - I really appreciate it and will recommend you whenever I can”

HOW WE HELPED OTARI SCHOOL—

In the short time we have been working with Holistec, we have found the staff to be really friendly and respond to calls promptly. They are happy to talk you through things over the phone, or will come to the school if all else fails! We have found them to be really diligent in contacting us to make sure everything is OK. Mike is happy to drop in, and being an ex-parent of the school, it is great to have that personal connection. Holistec are happy to pick up computers which need repairing, rather than us having to source couriers. All in all, we have had a really positive experience with Holistec.

Clifford Wicks - Principal

We also provide our complete outsourced Managed IT solution to more than 40 businesses across the Wellington region including:

POCOCK TONG TRASS

A leading Chartered Accountancy practice based in the heart of Wellington. Their client base includes many successful entrepreneurial businesses who have an eye on growth! Pocock Hudson view each client as a partner, and their success is Pocock's success. Their philosophy is 'right thinking', and in having the right thinking, it brings the right results for both Pocock and their partners.

DARROCH FORREST

The law of dispute resolution (and legal processes) can be complex. It is a game in itself. Understanding the law and the legal process is one of the skills of a good lawyer. And Darroch Forrest are the best in the business.

KITCHEN STUDIO

Over 3,300 kitchens have been fitted by Kitchen Studio in the Wellington region since it began in 1989! They have also supplied and installed kitchens in Queenstown, Taupo, Hamilton, Christchurch and the Wairarapa region, and as far away as Siberia!

ANGLICAN FINANCIAL CARE

Anglican Financial Care / Te Maru Mihinare operate superannuation schemes for clergy and employees of the Anglican Church and other religious charitable organisations and a KiwiSaver scheme aimed at people associated with Christian organisations. AFC is the Trustee, the Manager, Administrator and Investment Manager of the Schemes.

SAWREY CONSULTING

Sawrey Consulting Engineers aims to be the premier engineering consultancy in Wellington. The Sawrey Team endeavour to exceed the expectations of their clients with great engineering advice, delivered on time.

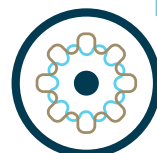

“Financial Statement”

Holistec Systems is a privately held company and as such does not disclose full financial records. What we can say is that our company generates a modest profit in the NZ\$2M-NZ\$5M revenue segment with excellent gross margins - operating on 10 full time and 2 part-time staff against a backdrop of 250 Customers

MIKE ROSS - DIRECTOR - AUGUST 2019

OUR OFFICES

We are ideally located within the CBD of Wellington at Level 5, 85 The Terrace, Wellington, with our secure Customer data centres being in Auckland New Zealand and Los Angeles, USA.

**BUSY INSTALLING A NEW NUTANIX
NETWORK THIS WEEK**

OUR COMMUNITY WORK

*You never know when you or someone
you know may need them! That's why
Holistec is a Life Flight Community
Partner*

COMMUNITY PARTNER 2020

WHAT IS LIFE FLIGHT?

Life Flight is a non-profit charity that provides services for a Life Flight National Air Ambulance and Life Flight Westpac Rescue Helicopter. Based at Wellington Airport, they provide lifesaving work across New Zealand – on average somebody needs their help every six hours!

Life Flight has been operating for nearly 40 years and during that time, 26,000 people have been helped, many of whom were saved through this emergency flight.

They were the first dedicated rescue helicopter across New Zealand, and it was their founder, Peter Button and people supporting him in the beginning, that has made Life Flight what it is today. *Where would we be without them?*

CRITICAL STATUS

It is critical for a country like New Zealand, with its diverse and often remote landscapes to have a resource such as this. Becoming a Community Partner allows Holistec to contribute in some way to a much needed lifeline to ensure they can continue to rescue people from extraordinary circumstances 24/7, and contribute to an emergency lifesaving or critical flight.

We are very proud to be associated with such a remarkable charity, while recognising that there are many other worthwhile causes across New Zealand, all of whom require on-going funding.
